1. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Italy on 9/27/01. It is noted, however, that applicant has not filed a certified copy of the Italian application as required by 35 U.S.C. 119(b).

2. This application is in condition for allowance except for the following formal matters:

- a. The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or
REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)
- (e) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (f) BRIEF SUMMARY OF THE INVENTION.
- (g) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (h) DETAILED DESCRIPTION OF THE INVENTION.
- (i) CLAIM OR CLAIMS (commencing on a separate sheet).
- (j) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (k) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if

the required "Sequence Listing" is not submitted as an electronic document on compact disc).

b. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the Venturi effect suction system (claims 19 and 20) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered. Re applicant's comments, while a Venturi effect system may be a "natural effect", it is believed to be distinct from the system now set forth in claim 9 as amended. Therefore, it is unlikely applicant will be able to show a Venturi effect system that meets the limitations of claim 9 without introducing new matter.

Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of

any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

c. Claims 4, 9, 11, 12, 14, and 19-20 are objected to because of the following informalities:

In claim 4, line 2, --a-- should be inserted after "and".

In claim 9, line 8, "an arm of a robot" should be --the arm of the robot--;

lines 9-10, "the arm ... suction system" should be replaced with a comma;

line 11, a comma should be inserted before "the" (first occurrence);

line 12, a comma should be inserted after "wafer";

line 14, a comma should be inserted after "port";

and line 15, a comma should be inserted before "wherein".

In claim 11, line 2, --a-- should be inserted after "as".

In claim 12, line 3, "particularly ... tool" should be deleted.

In claim 14, line 1, "dept" should be --depth--.

Claim 19 should be canceled if unable to overcome the drawing objection.

Claim 20 should be amended so as to not depend from claim 19 if canceled, and line 2, "for ... gas" should apparently be deleted.

Appropriate correction is required.

3. Claims 1, 3, 5-8, 10, 13, 15-18, and 21 are allowed.

4. Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213. A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
